

VIPIN KUMAR SINGH

Lead DevOps Engineer | Leeds, United Kingdom

☎ +44 7438 022 070 | ✉ vipinkus24@outlook.com | [LinkedIn Profile](#) | [GitHub Profile](#)

PROFESSIONAL SUMMARY

Lead DevOps Engineer with rigorous hands-on cloud and DevOps expertise in Azure, combined with strong full stack development experience in React, Next.js, TypeScript, Node.js, and modern JavaScript frameworks. Proven in designing, building, and shipping high-quality web, mobile, and API products for large-scale applications (27M+ monthly users), using CI/CD pipelines (Azure DevOps, GitHub Actions), Infrastructure as Code (Terraform), and observability tools (Azure Monitor/Application Insights). Passionate about clean, testable code, TDD, peer reviews, security best practices, and cross-functional collaboration in Agile teams to deliver user-focused solutions that drive business value. Curious about other cloud platforms with a pragmatic approach to balancing quality, security, delivery, and continuous improvement.

CORE SKILLS

- **DevOps & CI/CD:** GitHub Actions, Azure DevOps Pipelines (YAML), Terraform, Azure Artifacts, Release Management
- **Languages & Frameworks:** TypeScript, JavaScript, React, Next.js, Node.js
- **Cloud Platforms:** Azure (App Service, Azure SQL, Storage, Key Vault, vNets, NSGs, Application Gateway, Monitor, Active Directory), interest in AWS
- **Testing & Quality:** TDD, Unit Testing, Peer Reviews, Static & Dynamic Application Security Testing (GHAS, Snyk, Trivy, SonarQube Sonar Cloud, CodeQL)
- **Monitoring & Observability:** Azure Monitor, Application Insights
- **Source/Version Control:** Git/GitHub/GitLab, Google Release Please
- **Content Management System:** Adobe Experience Manager, Amplience
- **Other:** Agile/Scrum, Docker, Mentoring & Knowledge Sharing

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer – [TCS](#), United Kingdom

Sep 2022 – Present

- Designed and implemented CI/CD pipelines using GitHub Actions and Azure DevOps to automate builds, tests, and deployments, reducing release times by 40% and improving reliability.
- Provisioned secure Azure infrastructure (100+ resources including App Services, storage accounts, vNets, subnets, NSGs, Key Vault) using Terraform, ensuring enterprise-grade compliance, network security, and seamless integration with development workflows.
- Contributed to the development of [asda.com](#) e-commerce website & [ToYou](#) parcel management systems.
- Automated their CMS([Amplience](#)) schema management system using [Google Release Please](#) and [Lerna](#) for streamlined mono repo versioning, automated releases, and efficient schema updates.
- Built and maintained responsive mobile apps (Collection & Return, SPK, Terminal Emulator, Newsflash, TPMS), reducing APK size by 18–57% using modern JavaScript frameworks.
- Engineered 60+ Node.js APIs for high-traffic applications (99% uptime, 35% efficiency gain), exposed via APIM for public and private access.
- Developed 6+ React.js web applications (all live, 28% user engagement boost, 42% load time reduction).
- Integrated security scanning ([Sonarqube Cloud](#), [GHAS](#), [Snyk](#) and [Trivy](#)) across 300+ repositories, reducing critical vulnerabilities by 75% pre-deployment.
- Implemented observability stacks with Azure Monitor, and Application Insights, reducing MTTR by 30% through proactive monitoring, alerting, and incident automation.
- Collaborated in Agile cross-functional teams with architects, UX/UI designers, QA, and product managers.
- Contributed to sprint planning, estimations, retrospectives, mentoring juniors, and enforcing TDD/code quality practices (reduced defects by 21%, recognized with Tata Innovation Award).
- Mentored teams on automation practices, reduced cloud spend by 12% and led incident response with automated runbooks and RCA.

Lead Software Engineer – [TCS](#), United Kingdom

Apr 2018 – Sep 2022

- Automated deployments for web/mobile apps using CI/CD pipelines with modern programming languages like Python, improving release speed by 24% and reliability in high-traffic environments (27M+ monthly users).
- Integrated PayU and Razorpay for [Tata Neu](#) & [AirAsia](#), enabling secure transactions for 500K+ monthly users.
- Co-developed new modules for [AirAsia Partners](#), expanding platform functionality by 25% and contributing to 15% YoY revenue growth.
- Deployed Snyk and Application Insights for [DigEca](#), improving security compliance scores by 18% and performance optimization.
- Improved PR review process and enforced TDD practices, reducing production bugs by 40%.
- Streamlined publishing workflows in [AEM \(Adobe Experience Manager\)](#), reducing content update time by 24%, authored comprehensive documentation for APIs, deployment processes, and system architecture.

App Developer – HPC Sphere, India.

May 2017 – Apr 2018

- Built responsive PWAs using React.js, Material-UI, and Redux, improving mobile load times by ~40%.
- Developed unit tests with Jest achieving 85%+ coverage across core components.
- Authored and reviewed 50+ pull requests, upholding stringent code quality standards.

PROFESSIONAL ATTRIBUTES:

- Collaborative mindset with ownership of tasks
- Genuine curiosity for cloud technologies
- Strong communication with stakeholders
- Positive, pragmatic approach to delivering customer value.

EDUCATION

- Bachelor of Technology in ECE, [APJAK Technical University](#), India

Apr 2013 - May 2017

CERTIFICATIONS:

- **Cloud (Azure):**
 1. [Azure Devops Expert](#)
 2. [Azure Admin Associate](#)
 3. [Azure Solution Expert](#)
- **AI:**
 1. [Azure AI Engineer Associate](#)
 2. [Agentic AI Accelerator](#)
 3. [Agentic AI Deal Ready](#)
- **Git:**
 1. [GitHub Advanced Security](#)
 2. [Github Actions](#)
 3. [Github Copilot](#)

KEY ACHIEVEMENTS

- Delivered 18+ enterprise-grade applications (web, mobile, API) using React, Node.js, and modern frameworks, supporting high-traffic environments (27M+ monthly users).
- Achieved 99.5% deployment success rate across 160+ Azure resources by implementing IaC (Terraform) and automated CI/CD pipelines.
- Reduced critical vulnerabilities by 75% through integrated security scanning (GHAS, Snyk, Trivy) across hundreds of repositories.
- Recognized with Tata Innovation Award for mentorship, innovation in engineering practices, and enforcing TDD/automation to reduce defects by 21%.
- Created end-to-end infrastructure for 8+ applications covering core Azure services (Active Directory, Management Groups, App Services, Azure SQL, vNets, NSGs, Application Gateway, Key Vault, monitoring tools).
